Value. Trust. Performance.

Reduce spend with actionable insight.

ViewMasteRx®

## Centrally Manage Pharmacy Information for Realized Savings

Save money on operational expenses, medications, and waste with instant access to ViewMasteRx, a powerful, yet easy-to-use web-based tool customizable to your organization.

ViewMasteRx addresses the most common elements of pharmacy information through three central features:

Tracking

No matter how your team submits medication orders, staff can log on and instantly check the status through ViewMasteRx to avoid delays and skipped doses. And, for even added efficiencies, nurses can monitor medications and scheduled deliveries with Order Alerts. Available via email, text, or fax, the alerts:

- Show the number of prescriptions that are processing without issues
- Highlight those orders for which prescriptions cannot be delivered and the reason, such as prior authorization required, refill too soon or Class II drug

Medication Management

With ViewMasteRx, medication orders, refills, discontinues, destructions, and returns are secure and quick, freeing staff to spend more time caring for residents. Key benefits of the system's management functions include:

- **Online Fills:** Nurses can order online from their stations and physicians can e-prescribe for both controlled and non-controlled orders to any of our pharmacies nationwide

- **Split-billing Returns:** ViewMasteRx provides an easy return process for unused medications and split billing with third party payors at discharge to save clients up to 10%

- **EMR Integration:** All mediation dispense information interfaces automatically with enterprise EMR/EHR systems in real time

- **Optimized Administration:** Nurses have direct, instant access to policies and procedures manuals, the PharMerica Lending Library, and IV-related resources such as clinical information, equipment instructions, and links to pertinent materials and forms

Billing and Reporting

Avoid surprises to your bottom line with immediate access to the latest data. This actionable insight into billing, utilization and resident-specific activities allows you to:

- **Streamline Billing:** You can customize your own billing data fields and import the data into your facility's billing system

- **View Pending Charges:** Pending charges and current and past invoices can be reviewed at any time using the standard report available thru ViewMasteRx. Plus, advanced options allow insight into charges for specific residents, drug names, prescription numbers, and more.

- **Resolve Invoice Questions:** Through an integrated Invoice Resolution Center, you can request, track adjustments to, and correct invoices to address billing issues before they occur

- **View Savings Opportunities:** Find out how much you'd save by using generics or receive alerts for therapeutic drug substitutions pre-admission

- **Customize Reporting:** Utilization management, census and custom medication-specific reporting is available through ViewMasteRx so staff can generate reports at any time. Facilities also have direct access to our consultant pharmacist reports.

PharMerica provides innovative solutions to control pharmacy costs, ensure accurate and timely access to medications, and remain in compliance with state and federal regulations.
